WORK EXPERIENCE

Tezo Digital

Full Stack Developer Intern

Hyderabad,Telangana
Jan 2024 – Present

- Built 10+ responsive frontend applications using Angular, ensuring cross-device compatibility and optimal user experience.
- Developed and maintained backend services using .NET and SQL Server, leveraging ADO.NET and Entity Framework for efficient data access and manipulation.
- Engaged in continuous learning and growth by staying updated with the latest industry trends and technologies, resulting in the implementation of cutting-edge solutions and a 15% reduction in development time.

HighRadius Corporation

Product Engineering Intern

Bhubaneswar, Odisha
July 2023 – Dec 2023

- Worked as a Java backend developer, actively contributed to Autonomous Collections Software of HighRadius, leveraging my expertise in core java and java frameworks such as Struts, Spring, Hibernate.
- Built an advanced ML model for customer order amount prediction with an accuracy of more than 90%.
- Developed and implemented a backend-enabled invoice management system web application with a clean and elegant UI, reducing manual effort and cutting processing time by over 50%.
- Learned company standards of application software development, Agile, and iterative development methods.

PROJECTS

Employee Directory

Sept 2023

- A comprehensive web application with an elegant design in the frontend using Angular and .NET WebApi for the backend.
- Designed for maintaining organizational records, allowing for efficient storage and retrieval of employee data (using 10+ APIs).
- Authored advanced filtering options to enable users to search employee data by department, role, and location (or all three combined and multiselect), enhancing data accessibility and management.
- Enabled 5+ robust role management features, including the addition, editing, and assignment of roles to employees, ensuring streamlined role-based access and effective organizational structure management.
